Radio Piccolo XR

*A New Remote Terminal
Unit for the IRRInet System*

The Piccolo-XR RTU is a small sized unit consists of electronic board packed in an IP67 sealed waterproof plastic enclosure.

The unit operates up to 4 solenoids and receives up to 7 inputs (in different models). The Piccolo-XR also has analog I/O options.

The Piccolo-XR communicates via a two-way low-power radio with the PIU (Piccolo Interface Unit) which is attached to the IRRInet-XL, and with other Piccolo-XR units, up to a distance of approximately 3 km.

Up to 256 digital inputs

256 solenoid outputs

32 analog inputs

32 analog outputs of Piccolo-XR are supported per one IRRInet-XL unit

Power:

External 6VDC battery

Ambient Temperature:

-30°C to +60°C (-22°F to +140°F)

I/O options:

- 1 solenoid output + 1 digital input
- 2 solenoid outputs + 2 digital inputs
- 4 solenoid outputs + 4 digital inputs
- 7 digital inputs + 1 solenoid output
- 1 analog input
- 1 analog output
